## Unpacking and correct CE marking

Unpack and check content against the Packing slip

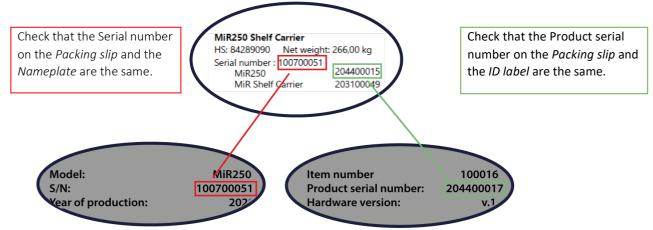

## Unpack the product(s) and find the *Packing slip* and the *Nameplate*.

- Confirm that all products are delivered as described on the *Packing slip*.
- Locate the following numbers on the *Packing slip*:
  - Serial number: This number, starting with 1, covers the assembled and CE marked application, for example base robot and top module. The serial number is also found on the nameplate.

Packing slip

[Name of product] e.g. MiR250: This number, starting with 2, is the individual products' unique number referred to as Product serial number on the ID label. The ID label is already applied to the product.

- Assemble the product(s) according to the mounting instructions.
  - NOTICE: Only products listed under the same Serial number on the Packing slip may be assembled.
- 5. Apply the *Nameplate* as described below.
  - NOTICE: Failure to apply the nameplate correctly will invalidate the CE mark.
- 6. Clean the area shown on the images below with a degreasing agent. Wipe away any excess cleaner and apply the nameplate to the specified area as shown below.
